Abstract (en)
[origin: WO2010115420A1] The invention relates to a compressor arrangement (1) having an axial compressor (10) and a radial compressor (20) disposed one after the other on a common driveshaft (30) that can be coupled to a drive (60), and each comprising a compression fluid inlet (11, 21) and a compression fluid outlet (12, 22), wherein the axial compressor has first control means and the radial compressor has second control means, and wherein the first and the second control means can be actuated separately, so that the axial compressor and the radial compressor can be controlled separately.
