Abstract (en)

[origin: EP2417861A1] The device has continuous conveyor belts (100b) comprising static guide elements (211,212) and movable guide elements. The movable supports are arranged in the device regions (131,132) with increased pressure. The movable guide elements are provided on the continuous conveyor belts by movable supports. An independent claim is included for method for conveying strand of tobacco in cigarette.
