Abstract (en)

[origin: DE102010033937B3] The door leaf hinge part (10) has door band body (12), which is formed relative to a perpendicular transverse center plane runs to a drag axis (16) and relative to a parallel longitudinal center plane runs to the drag axis. Three holding pens (14) are formed centrally and symmetrically to the longitudinal center plane and are arranged symmetrically to the transverse center plane. Independent claims are also included for the following: (1) a door hinge device, which has a frame; (2) a method for mounting a door leaf hinge part; (3) a right or left usable door provided with hinge side; and (4) a method for mounting and adjusting a door.
