Abstract (en)  
[origin: US2010263485A1] Powder which is for a flux-cored wire intended to become alloyed with a molten metal bath and which is formed by particles composed with at least 95% of sulphur, characterised in that its granulometric population is defined by: 1  $\mu\text{m}$   $\leq$  d10  $\leq$  340  $\mu\text{m}$ ; 200  $\mu\text{m}$   $\leq$  d50  $\leq$  2000  $\mu\text{m}$ ; 500  $\mu\text{m}$   $\leq$  d90  $\leq$  2900  $\mu\text{m}$ . Sulphur-based flux-cored wire, characterised in that it contains the preceding powder, and in that the compaction rate of the powder within the wire is greater than or equal to 85%. Method for producing a sulphur-based flux-cored wire for alloying with molten metal baths.
