Abstract (en)
[origin: WO2010119221A2] The invention relates to an antitheft device (1) to be attached to an off-the-shelf commodity item, preferably a piece of clothing and in particular in close proximity to the edge of the item, comprising a first so-called fastening part (2), provided with a nail-type pinning element (4), and a second so-called attachment part (3) comprising a recess (50) capable of receiving said pinning element (4), and a locking system (5) for retaining the pinning element (4) in said recess, the two parts (2, 3) being connected to one another so as to be movable relative to one another when the pinning element (4) is outside the recess (50), characterized in that it comprises a spring (6) providing the elastic mobility of the fastening part toward the attachment part.
