Abstract (en)
[origin: EP2241841A1] The collector has an expandable plastic frame constituted by a case (11) on which a bottom constituted by an expandable insulating plastic plate is applied, where the collector is partly made of expandable insulating plastic material and obtained by sacrificial plastic mold technique or Sumiceller(RTM: foamed polypropylene sheet) technique. A reinforcement or flameproof charge e.g. organic charge, mineral filler, nanoparticle, conductive charge, long or short glass fiber, organic fiber, natural or organic natural fiber, is added to the expandable insulating plastic material.
