Abstract (en)

[origin: WO2010119208A1] The present invention relates to method for assisting in the development or use of a complex system including a plurality of elements having interdependent states and/or functions, a documentation (10) of the system identifying said states and/or functions, characterized in that it includes the following steps: the step of identifying events (24) of using the system in the documentation (10) by an automatic search of the symbols relating to a use of the system, such as a process describing a function performed by the system in one or more steps using said elements, and the step of assisting the user using an object-oriented programming of said processes according to the Uniform Modeling Language (UML) standard.
