Abstract (en)

The structure (1) has wall panels (3, 5) held at a distance from each other, and a pretensioning device arranged in a panel intermediate space (11) for pretensioning the panels on pressure. The pretensioning device has two end parts for fastening an elongate tractive force transmission part in a region of opposite end edges of the panels. The transmission part extends in a horizontal direction and/or is positioned such that horizontally directed compressive forces are produced in the panels. A filling material is provided in the space and comprises quartz silicate and melamine resin layer.

Abstract (de)

Bei einer Wandkonstruktion für ein Squash-Spielfeld, umfassend auf Abstand gehaltene Platten (3,5,103,105,303,305), ist vorgesehen, dass wenigstens eine Einrichtung zum Vorspannen der Platten auf Druck im Plattenzwischenraum (11,111,311) angeordnet ist.
