Abstract (en)
The automatic storage system for pharmacies comprises medicine containment means (7) arranged at a storage zone (4) and means (8) for gripping and releasing said medicines arranged in vicinity of the storage zone (4), suitable to be actuated to access the containment means (7). Automatic recognition and identification means (94) are arranged in a medicine identification station (92), accessible to the grip and release means (8). Transporting and singling means (9) are suitable to receive the medicines from the grip and release means (8) and to transport the same medicines to at least one delivery station (10), as well as to receive from load means the medicines to be stored in said containment means (7) and to supply the same medicines to be stored to said grip and release means (8).
