Abstract (en)
[origin: EP2421016A1] The operating device (11) has a rotary knob (13) including an OFF state in which the operating device is disabled, and working state for function setting of heating device. The rotary knob is set in working state by rotating the knob to working angle range in rotational direction. A turning angle detector is connected to control unit of operating device for detecting the rotation angle of the knob. An independent claim is included for control method of operating device.
