Abstract (en)
[origin: WO2010122154A1] The invention relates to an LED light for refrigerated vending furniture (1), in particular refrigerated shelves, comprising a plurality of LEDs (4, 9) for illuminating the vending furniture. The invention is characterized in that at least some of the LEDs of the LED light are designed as at least one linear LED unit (3), e.g. a wall floodlight, which is mounted in the top region of the refrigerated piece of vending furniture, especially below the top closing cover (7) of the refrigerated shelf unit. Furthermore, the emission characteristics of the linear LED unit (3) are limited to a specific angle, and the linear LED unit (3) has an asymmetrical light intensity distribution, the asymmetrical emission characteristics of the linear LED unit (3) being obtained using a specially designed asymmetrical lens (20).
