Abstract (en)  
[origin: WO2010121791A1] Water-free high-solids base paint having a solids content of at least 35 wt.-%, comprising (a) 1 to 10 wt.-% of at least one polyester binding agent, which has an acid number of at least 20 mg KOH/g, (b) 10 to 30 wt.-% of at least one acrylate binding agent, (c) 9.5 to 30 wt.-% of at least one cross-linking agent, selected from the group consisting of free isocyanates, blocked isocyanates and aminoplast resins, (d) 1 to 3 wt.-% of at least one sulfonic acid catalyst, (e) 1 to 35 wt.-% of at least one pigment, (f) 30 to 65 wt.-% of at least one organic solvent and (g) 0.5 to 47 wt.-% of at least one auxiliary or additional agent, each based on the total weight of the base paint. The invention further relates to the production and use of the base paint for producing a multilayer paint and to the multilayer paints obtained in this way, and to metal and/or plastic substrates coated therewith.
