Abstract (en)

[origin: WO2010123703A2] A label assembly that includes a face sheet with at least one label shape defined by one or more tearable lines of separation, a back sheet adjacent to the face sheet, and an adhesive material disposed between the face sheet and the back sheet. The back sheet has a removable panel disposed over the label shape adhesive material and a registration structure aligned with the label shape. The registration structure is one of raised or raisable above the back sheet surface. The registration structure provides registration over the label shape for an object to be adhered to the adhesive material of the label, without the need for a separate applicator device.
