Abstract (en)

[origin: WO2010122241A2] The invention essentially relates to an attachment part (1) for assembling a module (30), in particular a photovoltaic module, on a ribbed metal sheet (20) including an alternation of ribs and lands, essentially characterized in that it comprises an overhang (2) enabling the assembly of two adjacent metal sheets by overlap of their side edges. The invention also relates to an assembly including the ribbed metal sheet (20) and one or more modules (30) rigidly connected to the metal sheet (20) by attachment parts (1). This assembly can be used for making building covers.
