Abstract (en)

[origin: EP2423112A1] The device has a folding device i.e. folding turret (23), for folding blanks from a package material i.e. thin card board. A transport line (24) i.e. packing line, is connected to the turret. Glue application stations (32, 33) with glue assemblies (34, 35, 40, 41) i.e. glue nozzles, are arranged in the transport line for applying glues on folding arms of the blank. The glue assemblies are arranged in a glue application position on both sides of the transport line in a height of the folding arms. The glue assemblies are movable in a cleaning position for cleaning the glue assemblies. An independent claim is also included for a method for manufacturing cigarette packages i.e. folding box-type cigarette packages.
