Abstract (en)
[origin: EP2423128A1] A package for tobacco (100) comprises a receptacle (110) adapted to accommodate loose tobacco and including a front wall (112), a rear wall (114), a first (116) and a second (117) major lateral wall opposite to each other, and a first (118) and a second (119) minor lateral wall opposite to each other, wherein an access opening (120) is provided in the front wall (112). A closing structure is movable relative to the receptacle (110) from a closed position, in which the closing structure closes the access opening (120), to an opened position, in which the access opening (120) is accessible. In an advantageous embodiment of the invention, the closing structure comprises a flap (130), which is foldable onto the access opening (120) and is secured in the closed position by means of a locking lid (150). A cigarette paper booklet (140) can be attached to the flap (130).
