Abstract (en)
[origin: EP2423147A1] The load rotating assembly has a longitudinal support (2) on which a crane trolley (3) is movably arranged in the horizontal direction. A wheel (4) is attached with crane trolley so that crane trolley slides along a rail (5). A chassis (15) is coupled to a crane trolley through a coupling rod (16). The support units (7,14) are connected with crane trolley and chassis so as to suspend the load (9) via hooks (8,14) respectively so that raising and lowering of load is possible.
