Abstract (en)  
[origin: EP2423409A1] The protective wall (1) has a U-shaped holding pocket (11) arranged on free ends of legs (5, 6) of a U-section rail (4). Two holding plates (12, 13) are attached to a holding fixture (14) that is fixed to a floor (2), and a holding groove (15) is provided on an outer side of a web (7) of the U-section rail. A locking body (16) is inserted into the holding groove and supported on the holding fixture along a vertical direction, where the locking body is moved along a horizontal direction relative to the holding fixture.
