Abstract (en)

The housing i.e. inner housing (3), has two housing portions (3a, 3b) arranged along an axial axle, where the housing portions are axially connected with each other by a heat shrinking process. One of the housing portions has a recess formed in a circumferential direction, and the other housing portion has a projection formed in the direction, where the projection is pressed into the recess. The latter housing portion is arranged behind the former housing portion in a radial direction, where the housing portions are made of chrome steel. An independent claim is also included for a method for manufacturing housing portions.

Abstract (de)

Die Erfindung betrifft ein Gehäuse (3) für eine Strömungsmaschine, insbesondere Dampfturbine (1), wobei das Gehäuse ein erstes Gehäuseteil (3a), ein zweites Gehäuseteil (3b) und ein drittes Gehäuseteil (3c) umfasst, wobei die Gehäuseteile (3a, 3b, 3c) jeweils über eine Verschrumpfung (11) miteinander verbunden sind.
