Abstract (en)
[origin: EP2423580A2] The steam generator has housing (2) which is divided into two portions by a partition wall (17). An electrical connection portion (16) is provided in first housing portion. A steam generation unit (10) is provided in second housing portion. A recess is formed in a cooling unit (20) which is attached to partition wall for allowing flow of cooling medium such as cooling water to cool the steam generator. A lead line (21) for water supply is opened into the recess.
