Abstract (en)

[origin: US2010275341A1] A seamless, single layer, multi-yarn glove or glove liner is disclosed. The glove or glove liner includes a first type of yarn and a second type of yarn that is different from the first type of yarn. The glove or glove liner has a single layer that includes the first type of yarn and the second type of yarn knitted together to form a hand-like structure that includes a thumb section, a plurality of finger sections and a palm section. The first type of yarn is different that the second type of yarn. For example, the first type of yarn may be a cut resistant yarn and the second type of yarn may be an inexpensive elastic yarn such as Spandex. An optional cuff is part of the single layer, the cuff optionally comprising a tab to aid in donning and doffing. The glove can further comprise a tab with indicia, where the indicia can be, for example, shape or color to convey information about the glove such as size or cut resistant properties. Padded protection on the knuckles can also be provided.
