Abstract (en)
[origin: WO2010125197A1] The invention relates to a hand shower comprising a shower head (30), which has at least one inner chamber (21, 22, 23) having a plurality of nozzle openings in the bottom surface and which has at least one feed opening (26.1, 26.2, 26.3) per inner chamber (21, 22, 23) at the outer circumference, to which feed opening (26.1, 26.2, 26.3) flow can be directed in each case by means of a feed element integrated in the hand shower housing. Flow is directed to at least one of the inner chambers (21) by means of an additional flow channel (11), which has at least one overflow opening (16) and/or overflow edge (12.1), by means of which overflow opening (16) or overflow edge (12.1) the flow channel (11) is connected to the chamber (21).
