Abstract (en)
[origin: WO2010125354A1] A package comprises a container (28) and a pour spout fitment (2) attached thereto, the fitment (2) comprising a pour spout (6), a closure (4) covering an outer end of the spout (6), and a tamper-evident arrangement attached to the spout (6) or the container (28), on the one hand, and, more weakly, by at least one frangible bridge (14) to the closure (4), on the other hand, the arrangement being such that, through opening of the closure (4), the or each bridge (14) is broken, but at least one significant portion (15) of the tamper-evident arrangement remaining attached to the spout (6) or the container (28) can project laterally outwards noticeably. In one embodiment, the or each significant portion (15) is pre-stressed laterally outwards and is a leg portion (15) extending longitudinally of the spout. In other embodiments, the or each significant portion (42) is arcuate and extends about the spout (6).
