Abstract (en)
[origin: US2010275368A1] A combined sink and storage rack assembly is disclosed. The assembly includes a sink basin, a work area integral with the sink basin, and a wire rack hung underneath the work area at a side of the basin. Spring clips mounted on the sink basin and work area hook the rack. Sections of the rack's wire that insert into the spring clips are coated with an elastomer, such as silicone rubber, in order to dampen vibrations transmitted from the sink.
