Abstract (en)

[origin: WO2010125301A1] The present invention relates to an automated device (1) for dispensing products, including a housing (2) accessible via an opening hinged on a sleeper (5) and made of a frame (6) bearing a flexible polycarbonate plate (7), said housing (2) also including an interface (3) for display and input by a user, characterised in that said opening includes rigid means for retaining said interface (3) onto said frame (6), in the form of junction mounts that make it possible to place the interface (3) on the front surface through an opening having a corresponding size and formed in said plate (7).
