Abstract (en)

[origin: EP2425732A2] A replaceable bicycle shoe cleat assembly includes a first cleat member (10) and a second cleat member (20), which can be replaced independently from a bicycle shoe (90) when worn out. Therein, the new cleat member can get positioned by the remained member and thus be accurately fixed to the bicycle shoe (90) at a position where the replaced cleat member was formerly installed.
