Abstract (en)
[origin: EP2425899A1] A valve block (2) connects the coating material lines to an application device within a parallelepiped housing (8) having a central ink channel (20) with valve bores (26,32,38,44) for receiving valves in an axial direction (A). Valve bores (26) of first junction are opened and valve bores (32) at second junction on opposite side of color channel offset from valve bores (26) are opened. Parallel valve bores (38,44) are opened at third and fourth junctions. The mouth portions, second and fourth junctions in same axial position of color channel are opened.
