Abstract (en)

An improved device (10) for filling molten metal into pressing chambers in die-casting machines, especially of the type that uses non-ferrous alloys such as aluminium and alloys thereof, stabilised relative to a die-casting machine (12) and to a mould (14) formed by two dies or half moulds (16, 18), a container cylinder (20) provided with a chamber (22) for feeding with liquid metal (24) collected from a smelting tank (23), an injecting piston (26) sliding axially within the same container cylinder, means for feeding and controlling the liquid metal inside said chamber.
