Abstract (en)  
[origin: EP1925413A2] The machine has an extruding press device (4) with a dehumidifier device for small part, and a small part feed (6) arranged upstream of the dehumidifier device. The dehumidifier device produces a level of 6-14 percentage of absolute humidity. The dehumidifier device is designed as a belt humidifier, which includes a movable and air permeable small part support and a heating device for dry air flow having temperature of less than 120 degree Celsius.
