Abstract (en)  
[origin: EP2426279A2] The kit has interfaces (13a, 13b) for arranging a fitting- or hydrant element at a stop valve (12) and/or for integrating an installation fitting (10) and/or a carrier plate (11) in a line system. An adapter piece is freely selectable according to an installation situation and durably or detachably connected with the interfaces or the carrier plate. The interfaces or the carrier plate is connectable or adaptable to a connection point with the line system over the adapter piece. A partially circulating flange (18) and/or a ring are provided at a periphery of the carrier plate.
