Abstract (en)
[origin: EP2426296A1] The window or door has a swivellable actuating member (5) attached onto a visible surface toward an inner side. A leaf (1) covers a fixed frame (2) inward of a room, and is overlapped on an outer side of a building by the frame up to a point into an area of a solid pane (7). A connecting rod fitting includes an actuating member that is located on the visible surface of the frame. A swivellable shaft is fixed parallelly with respect to another swivellable shaft and detachably coupled to a connecting rod drive by a transmission member that bridges a step joint.
