Abstract (en)
The storing compartment (A) of the invention comprises at least one chamber (4) into which various stuff can be stored; at least one openable / closable lid (1) which close the top of the chamber (4). The compartment (A) is also provided with at least one egg container (2) in the chamber (4) and at least one arm (3) hingedly connected at a joint (7) to a fixed surface. The lid (1) is hingedly connected to a fixed surface so as to pivot about a joint (6). In addition, the egg container (2) is both hingedly connected to the lid (1) by means of one joint (5) and hingedly connected to the said arm (3) by means of another joint (8).
