Abstract (en)

[origin: TW201043469A] Embodiments of the present disclosure relate generally to body gear having designed performance characteristics, and in particular to methods and apparatuses that utilize an array of heat managing elements coupled to a base fabric to direct body heat while also maintaining the desired transfer properties of the base fabric. In some embodiments, the heat managing material elements include heat management elements that reflect heat or conduct heat, and may be directed towards the body of a user or away from the body of the user?
