Abstract (en)
[origin: WO2010128264A1] The invention relates to a closing part (1) for a shoe (2) that includes an upper (3) comprising an open area (5) for facilitating the insertion of the foot into said shoe (2), said closing part (1) being designed so as to close said open area (5), said closing part (1) being characterized in that it comprises a unitary portion (100) to be attached to said upper (3) by means of at least first and second zip fasteners provided on either side of said open area (5), respectively. The invention also relates to a shoe closing device.
