Abstract (en)

[origin: WO2010127735A1] The invention relates to a rail freight train for transporting long welded rails (5), having a device (13) for anchoring the rails (5) disposed on the end of the rail freight train and composed of a number of insertion devices (14), each provided for anchoring an individual rail (5). The first clamping jaw (15) is securely connected to the device (13), while the second clamping jaw (16) is designed to be adjustable by means of a clamping wedge (21) displaceable in the longitudinal rail direction (20).
