Abstract (en)

[origin: WO2010127760A1] The invention relates to a check valve designed as a seat valve having a main valve body (6) in which a pilot valve (23) having a pilot valve body (30) and a pressure limiting valve (46, 50) are disposed. The pressure limiting valve is thereby integrated in the pilot valve body at least in segments. A main valve body made of plastic is thereby particularly preferable.
