Abstract (en)

[origin: WO2010127946A2] The invention relates to a refrigeration device, in particular a domestic refrigeration device, comprising at least one shelf for goods to be cooled and a body provided with a refrigeration chamber, said refrigeration chamber comprising two lateral surfaces. Support elements, respectively comprising a support surface on which the shelf is mounted, respectively comprise a rear end which faces towards a rear wall of the body and respectively a front end which faces away from the rear wall. Said shelf comprises at least one catch element which catches, in particular in a positive fit, with the front end or the rear end of one of support elements.
