Abstract (en)

[origin: WO2010128931A1] The present invention relates to a fuse holder for a motor vehicle having a plurality of electrical subsystems, wherein each electrical subsystem is adapted to be electrically connected to a fuse holder. The fuse holder is arranged to display information indicating the electrical subsystem to which the fuse holder is electrically connected, and is further arranged to be arbitrary placed in a fuse box having receiving means for the fuse holder. The invention also relates to a fuse box having receiving means for receiving such a fuse holder, and a motor vehicle provided with such a fuse box and fuse holder.
