Abstract (en)
[origin: WO2010127793A1] The invention relates to a display system, having a display module (2) that can be rigidly disposed behind a transparent surface (4) and has no power supply unit and further having a control device module (11), which can be connected and/or is connected in a signal-conducting manner to the display module (2) by way of a flexible cable (12) that can be freely installed and which is separate from the display and can be placed relative to the display module (2) freely within the range of the cable (12), comprising at least one standardized input jack (20) having a defined height (h) for receiving an analog or digital antenna or video signal.
