Abstract (en)
[origin: EP2428136A1] A rail structure (1) fastens to a furniture structure relative to a carcass rail (1) displaceably guided by a central rail (2) on one above other. A differential roller (17) is equipped with a match portion in vertical direction. An extension rail (3) is moved from a gap formed between differential roller and support roller (16). A tongue portion is displaceably mounted on central rail. Displacement devices (31,32) are moved from a passive end position in which tongue portion is outside, and to an active end position in which tongue portion is inserted at gap.
