Abstract (en)
[origin: EP2428152A2] The suction cleaning device has a suction aggregate (110), which stands in flow connection with a dirt collection container over a filter device (32). The filter device has a filter carrier (38), at which a filter unit is held. The filter device has a supporting part (98) that is fixed at the filter carrier. The filter unit lies at a cleaning side.
