Abstract (en)

[origin: EP2428194A2] The holder has a lower support rod whose support portion (3) is arranged centrally at a wheelchair (1) such that child seat (20) or child transport casing is approximately in center front of the wheelchair. The support rod is fastened such that the foldable wheelchair is moved freely. The holder portion in wheelchair is used as the fixed portion parallel or diagonal to the support portion of the wheelchair. A support rod is extended with mounting brackets with pipe section arranged on to be translated vertically telescopic tube piece.
