Abstract (en)

[origin: EP2428633A2] The profile (1) has an outer profile part (6) connected with an inner profile part (4) via connecting rods (5). An outer side surface (25) of a side wall (24) of the inner profile part is designed in an L-shape with an individual side bar (26) at an outer side or an inner side of the inner profile part. An insertion strip is detachably fastened at the side surface for holding a fitting part or a glass retaining strip. A receiving groove is defined between the side bar and the insertion strip and receives the fitting part or the glass retaining strip.
