Abstract (en)

[origin: EP2428748A2] The panel radiator (1) has a front plate (2) in which lower collecting channel (13) and upper collecting duct (14) are formed between collecting ducts heating channels (15), with an inlet port (47) on an underside (27). The heating unit is passed from underside to a top side (5) of the heater. A control valve at the top face (5) is provided to control flow rate of the heating unit from front plate into a rear plate (4) of radiator, so as to guide heating unit into front plate. An independent claim is included for method for passing heating medium through panel radiator.
