Abstract (en)  
[origin: EP2429037A1] The element (1) has a frame (4) provided with a thread for a terminal screw (3). An integrated connection piece (5) is arranged within the frame. The connection piece is formed for receiving conductors and/or receiving a current collection plug. The connection piece is formed as a two-part and comprises a housing element and a resilient element (15). The connection piece has slots for receiving the current collection plug. The current collection plug is clamped by the resilient element. The resilient element is formed such that the current collection plug is latched.
