Abstract (en)

The present invention relates to a household appliance, in particular an oven with a switch comprising a branching piece (40) having a terminal holding part (43) which provides connection to a switch output terminal (33); at least two branching arms (41, 42) whereon the electrical cables arriving to the related loads are connected in order to multiplex the electrical signal exiting the input terminal (31) of the switch. Said branching piece is characterized in that said at least two branching arms (41, 42) are at a higher point than the switch terminals (33).
