Abstract (en)
[origin: DE102009031586B3] The electrical installation equipment has a design cover and a socket at which a lighting device (3) is connected. The lighting device has a lamp (5) and the socket is provided with a supporting ring. The socket allows electrical connection to the installation system of the building. A receiving space present between the upper side of the supporting ring and the lower side of a design part is provided for the lighting device. An electrical circuit board (6) of the lighting device is received from a housing lower part (7).
