Abstract (en)

An electronic equipment enclosure (10) includes a frame structure (12), one or more panels (14, 17) attached to the frame structure, at least one vertical mounting rail (30) fastened to the frame structure, and a rail seal (40) attached to the at least one vertical mounting rail. The rail seal includes a generally flat panel portion and a seal along an edge thereof. The seal is adapted to engage at least one of the one or more panels to provide an air dam between the one or more panels and the at least one vertical mounting rail.
