Abstract (en)
[origin: WO2010130649A1] In a motor-driven handpiece (1), which has a grip sleeve (2) with a head area (5) for mounting a tool, in particular for the preparation of tooth substance and/or bone substance, the head area (5) is at least partially surrounded or encapsulated by a thermoplastic material which, compared to the material of the rest of the grip sleeve (2), has a lower thermal conduction value.
