Abstract (en)

[origin: WO2010130512A1] A hand-held power tool is provided with a housing comprising two separate and interconnected housing parts, one of which is designed as a handle part for holding and guiding the hand-held power tool. At least one housing part is associated with a vibration reduction element designed as a spring element. Said vibration reduction element is arranged in an intermediate space between the handle part and the other housing part.
